

# Packet Technologies' partners take Express ride

**PARTNERS OF PACKET** Technologies and Exinda Networks, were rewarded for their selling efforts with VIP treatment at the first local performance of Andrew Lloyd Webber's musical *Starlight Express* at Vector Arena in Auckland. Resellers qualified for free tickets by selling certain Exinda appliances from April to July. Many partners brought their families to the show and enjoyed hospitality in a private lounge. Packet Technologies director Frank Ollie conceived the idea for the promotion due to his love of trains.
